

Partner Profile – Generis and fme

With more than 20 years of experience, fme Life Sciences provides Business Consulting, Technical and Migration Services to support its clients implementing CARA solutions. Their dedicated team have been working with CARA since 2016 and they have a thorough understanding of its functionality and of the implementation process. Their migration product "CARA Connector" now supports migrations from legacy solutions to CARA. fme Life Sciences is a CARA Preferred Partner.

fme cooperatively developed the new Generis CARA connector for the migration-center product: fme migration-center. They have extensive experience migrating and consolidating legacy systems to the latest platform technologies which now includes CARA. They have a breadth of certified consultants whom have years of experience implementing RIM, Quality and Clinical solutions. fme also offers business consulting which includes governance definition, advisory consulting, process optimization and change management.

Why fme?

- Generis Preferred Partner
- 20 Plus years of Life Sciences experience
- Global services organization
- Certified CARA consultants
- End to end services provider
- Certified CARA migration product

Why Generis?

- Over 20 Years experience Global reach
- We work to understand your needs and processes, rather than making you move your processes fit to our solution
- New CARA = New Possibilities Expert teams
- Understanding of global industry challenges.

Previous Experience

fme and Generis worked together to help a customer achieve the consolidation, migration and upgrade of global systems across several repositories in Japan and the USA in order to remain compliant with FDA regulations. The customer achieved the most up to date back end solutions with the most current CARA platform. A FirstDoc application was replaced by CARA for a more streamlined front-end experience for the business community. fme and Generis are currently working together on several projects for customers to move from legacy systems to the new Generis CARA solution.

Future Plans

fme and Generis continue to strengthen their partnership together. The fme migration-center product now fully supports migrations to the new Generis CARA solution providing customers with an audited, proven solution. fme will expand resource capability by certifying more fme consultants on the CARA platform.

About

fme Life Sciences is a leading provider of business and technology services supporting the deployment of ECM solutions and associated business applications to its clients in the Life Sciences and other Industries.

We act as a trusted advisor and systems integration specialist across the Clinical, Regulatory and Quality and Manufacturing domains in Europe and North America

We design and implement proven best practice solutions leading to improved quality and compliance, enhanced competitiveness and secured future business. To this effect, we provide vendor independent consulting services. Our teams in Germany, the United States and Romania are experienced in managing global projects and leverage our cost-effective near-shore resources where appropriate.
