

The logo for Daquma, consisting of the word "DAQUMA" in a bold, uppercase, sans-serif font, with a thin horizontal line underneath. The logo is set against a dark blue square background.

DAQUMA

## Partner Profile – Generis and Daquma

Daquma is a business consultancy dedicated to providing support around quality management and data management for the life science industry. With their talented team, Daquma always deliver great impactful projects which, in close collaboration with their clients, ensure maximum value from implementations. Daquma ensures all projects and engagements are executed with a professional approach to maximise value and deliver on timelines in an open and honest setting.

The CARA Platform from Generis helps companies decrease their time to market by providing a comprehensive, unified platform for the core processes, data, and content of the product development lifecycle. Users can create, locate, and re-use information instantly in any process across the organisation, leading to accelerated work with greater accuracy of information.

## Why Daquma?

- Extensive background in pharmaceutical IT consulting
- Data & document migrations for highly regulated domains
- Multiple years experience from working in regulated industries with high local and global government legislations and requirements
- Data governance & quality approach establishes datasets that meet regulatory and internal requirements
- Specialist Validation & Test Services
- Project management and business analysis services

## Why Generis?

- Over 20 years' experience
- Industry leading data and content management platform (CARA) for powerful process and workflow automation
- Out of the box apps for the entire Life Sciences R&D landscape
- Leverage metadata to create, locate, and re-use information instantly for increased efficiency, and greater accuracy
- Powerful functionality: security, versioning, workflows, lifecycles, tools, automations, and integrations

---

## Partnership Benefits

The collaboration between Generis and Daquma will provide customers with a streamlined, secure, and compliant data & document migration from source systems to the CARA Platform, ensuring that data quality is maintained, and datasets meet regulatory and internal requirements.

Daquma holds vast experience in the field of migrating data to the CARA Platform from multiple source systems, facilitating the migration process end-to-end. When working with Daquma you receive a service that integrates great delivery competencies of IT systems, together with business process understanding. Thereby, bridging the gap between business ambitions and system implementation.

With Daquma, it's not just a migration, it's a step towards a full digital transformation, examining a company's current processes and identifying ways in which they can be more efficient and streamlined, preparing them for the challenges of tomorrow.

“ *We believe the partnership with Generis expands our ability to support the digitization of our clients business processes and domains.* ”

**Peter Smedegaard Andersen**  
Founding Partner  
Daquma
